

MAIN STREET RADIOLOGY PURCHASES SENTINELLE BREAST COIL FOR MRI

MAIN STREET RADIOLOGY has recently installed the Sentinelle Vanguard® breast MRI coil system, showing our continued commitment to being leaders in the field of Breast MRI.

The Sentinelle Vanguard high performance breast coil system optimizes image quality and access for positioning and intervention. Its award winning design also improves workflow and provides superior patient comfort. Sentinelle's suite of advanced technologies for MRI and intervention creates an integrated, flexible, and dedicated system, improving patient health care. Our systems feature:

- Unique Variable Coil Geometry™ to improve image quality
- Fully adjustable coils that fit any size or shape breast
- Full medial and lateral breast access for improved positioning and biopsy capabilities
- State-of-the-art ergonomic design with the option of positioning the patient's arms at the side or above the head
- Comfortable padding and adjustable cushions for increased patient comfort

MAIN STREET RADIOLOGY's team is committed to providing the best in patient care. For more information on the Sentinelle Breast MRI solution, visit sentinellemedical.com.
